STAT

February 5, 1975

My dear Congressman Mr. Rhodes, Senator Church and others,

What on earth are you all trying to do by proposing public investigations of any of our Intelligence Agencies?

This disgusting, stupid and world disgraceful way of Congress to PUBLICLY investigate any American Security and Intelligence Service agencies is un-American and beyond understanding...

IT MUST STOP AT ONCE

How can you all be so shortsighted? If you have some reason to believe the head of an agency is not doing the job required of him, or that he is inadequate, or outlived his usefulness, of course he should be replaced (but quietly NOT through a public investigation). If his organization has personnel any of you have true facts to believe such personnel have failed in their duties, or are no longer trustworthy, nor able to do a job expected of them, then you all should ask the head of that agency to clean up whatever mess has been made, relieve their Department of such unsuitable persons--quietly--not a Public Investigation.

But to flaunt a Senate or Congressional Public Investigation of any such agencies is NOT only absolutely wrong, and un-American procedure, BUT also shakes to the core our countrymen's confidence in US Government and denigrates the image of Congress, disgraced in the eyes of the world as well as immediately ruining confidence in America.

Such shortsighted (public procedure) of investigating our Foreign or Domestic Intelligence and Security agencies is stupid madness.

For our Country's and God's Sake, WAKE UP!

Leave whatever methods seem necessary to the wisdom of all Intelligence agencies to obtain information in any, or every way possible, if it is to help keep all harm or shadow of a doubt of harm, to come to our National Security.

It is absolutely essential to collect and gather all such information and keep records, so that our President and Vice President can be kept informed.

Our National Security is number one Priority.

Whether its Domestic Spying or any Anti-National Activity requiring investigation, our agencies should be allowed to do anything (in their trained good judgement) and by any means--tapes, etc., to find out facts and the truth.

.../2

- 2 -

As it is, our country is riddled with Foreign Agents, and most often in disguise as domestics living here. Of course people have human rights.

BUT

The multitude of American taxpayers have priority Human Right to know that there are well organized Government Intelligence Agencies in whom they can be confident our National Security is being watched by those trained in the highest level of excellence in these organizations to do their job wherever and however in this world it is necessary for them to perform and use the intricacies that it takes to do their job thoroughly.

As a matter of fact, we taxpayers have a right to know our Congressmen and Senators are the clean dedicated men we think we elected. It is past time a requirement be made that members of the Senate and Congress should be Publicly Investigated (if all is well with their life and records, there should be no objection to such an investigation). And this ought to be done at once.

But this whole business of shaking our confidence through Publicly Investigating of our Foreign and Domestic Intelligence Agencies is shocking, shortsighted, stupid un-American madness.

A quiet investigation may sometimes be necessary but the Agencies can do this. But for a Public Congressional Investigation giving rise to scandal-mongers and shaking world-wide confidence is wrong. You must be out of your senses as it opens our National well kept secrets to enemies who would destroy us.

Dear General Walters

We over here are  
horrified over such news -  
Also of course we  
see C.I.A. attacked  
everywhere - as well as  
old stuff (with little or  
no proof) being dug up -  
Who is the big Wig  
behind it all - News
